

### MAP 10 - 2020: submission to the UN of a map with the limits of the continental shelf claimed by Turkey

In March 2020 (18.3.2020), Turkey submits to the UN a map depicting, beyond the boundary line of the illegal Turkish-Libyan Memorandum, the entire area it claims in the Eastern Mediterranean. The outer limits of the area claimed by Turkey reach the outer limits of the territorial waters of Crete and the islands of Kassos and Karpathos, and enter Greek territorial waters in the area of Rhodes (the islets of Chena and Paximada).
