

Regional Public Health Authorities in the Slovak Republic

Friday, 23 January 2015 09:20

There are 36 regional public health authorities established in the Slovak Republic. According to the Act No. 355 Coll. of Laws on protection, promotion and development of public health and on change and amendment of some acts they have following functions:

1. participation in solving of national and international projects important for public health and performing scientific research in this field,
2. managing, directing and controlling of epidemiological surveillance of communicable diseases and fulfilment of immunisation program,
3. reviewing assessment of impacts on public health on regional level and on local level,
4. performing specialized tasks of public health and tasks of public health threats,
5. ordering measures for diseases prevention and measures against public health threats in scope of their territorial competence,
6. issuing binding standpoints and decision making in proposals in scope of assessment activities of the law, establishing commissions for examination of professional competence, issuing certificates of professional competence and maintaining register of professionally competent persons for epidemiological substantial activities stated in the act,
7. performing state health surveillance, issuing orders and imposing measures on elimination of shortcomings found during state health supervision,
8. securing access to information on bathing water quality during bathing season,
9. performing tasks of control body entitled to impose sanctions on placing of chemical substances and mixtures on market according to special ordinance,
10. cooperating with district offices and municipalities in elaboration of the plan of protection of inhabitants,
11. performing activities in the field of radiation protection and other activities.
